On mobile devices, Canvas is designed to be used within the Canvas mobile applications.

Mobile Applications

Canvas by Instructure (for iOS and Android). Search for the application in your App Store / Play Store. The applications provide access to Canvas for both instructors and students while on the go. Depending on your device, not all Canvas features may be available on the app at this time. View [Canvas mobile features](#) by version and device.

Instructure, who develops Canvas, is actively updating their native mobile applications to support as many Canvas features as possible. Instructure has four native mobile applications free for download on both phones and tablets. Please note that mobile applications are only supported in English at this time.

Technical Tips

- Allow pop-ups from the Canvas and Ursa websites

- Spreadsheet software (such as Microsoft Excel) and media player software (such as Windows Media Player, iTunes, or VLC) may be needed for some courses.
- You may be asked to download the most current versions of Java, Flash or Shockwave to support various course or research tasks.
- Anti-virus software: anyone interacting on the internet should strongly consider installing active anti-virus and anti-malware protection. There are many good programs available (for purchase or for free). You will want to choose the right solution for your needs.
