Course Description and Goals:

History 101 is a lower level survey of United States History from 1877 to the present. This course is intended to introduce students to the study of history through the topic of America, from its beginnings through Reconstruction with the aim of developing historical thinking skills and learning the content of history. The intent is to give the student not only a firm grasp of American history but also a solid understanding of why these events were, and still are, important. The course will examine these developments chronologically with particular emphasis placed upon foreign and domestic political, economic and military policies, as well as the evolution of industry and society. It is hoped that students will develop critical thinking skills that will be relevant to the student long after completing the course, regardless of their major or eventual career path.

Student Learning Outcomes:

1. Students will acquire a basic understanding of historical changes in American History since 1877.
2. Students will recognize that historical narratives are constructed by historians and change over time.
3. Students will discuss historical questions in written and oral form.
4. Students will learn to recognize the difference between primary and secondary sources and begin to think critically and analytically about the past.
5. Students will compose an outside paper, driven by an argument and supported by historical evidence.
